

SAFE 3038 S

Industry Leading Fountain Solution to Reduce Piling

FEATURES & BENEFITS

- REDUCES piling from alkaline paper
- REDUCES blue dot loss
- REDUCES Blanket washes.
- LOW VOC!
- CUSTOMIZABLE to suit your pressrooms needs.

TECHNICAL DATA

Raw pH	3.8
V.O.C.'s	0.61 lbs. per gallon
Dosage	5 to 6 oz. /gal
Conductivity	500 mmohs/oz.

PRODUCT DESCRIPTION

SAFE 3038 S is designed to work with alkaline paper and is compatible with all dampeners. This unique formulation utilizes a combination of synthetic lubricants which reduces piling and V.O.C.'s. SAFE 3038 S works with your ink, not against it. Therefore, the ink and water settings can be lowered and the pressman has more latitude balancing ink and water. Color is achieved quicker on restarts and the frequency of blanket washes is lowered, reducing waste and increasing profits!

SAFE 3038 S is the industry leader in reducing piling on stochastic printing!
